Some Cream.

Since the new cream-testing regulations went into force about a year ago, it has been noticeable that a number of the cream producers have suffered in having their cream put on a lower standard than formerly, and quite a few grievances have been registered, in consequence. At that, our worst grade in this Province must seem pretty good, by comparison, when we read the following from The Produce News, published at Seattle:

"A. D. Fish, State Dairy Inspector for Washington, has had a new lot of red tags printed, which he intends to attach to some of the cans of cream now being shipped into Seattle. When the above-mentioned red tag is prominently displayed on a can of cream it does not mean that it has taken first prize, but it does mean that the contents are on the way to make perfectly good soup.

The hot weather has increased the shipments of rotten cream to such an extent that Inspector Fish intends to condemn all cream which is unfit for human consumption, and will notify the shipper that the state law must not be violated.

It is not an usual for the cans of fermenting cream to explode with a report like a blow out of an auto tire. One creamery worker was severely injured on the head by being struck by a flying lid, it is stated.

Ray's Notes.

I of 'em comical nuts was in the garaj yest'day, and I tried to sell it a speedometer. He said he wasn't anecdin' I jest then as he could always tell how fast he were goin: I asked him how he could, and he sez: "Well, when I go ten miles an hour my lamps rattle; when I go fifteen miles an hour my mud guards rattle, and at twenty miles an hour, my bones rattle."

Mission Service in Edmonton.

Quite a large number of local church-goers attended the Mission service on Sunday last in St. Peter's Lutheran Church in Edmonton, which was conducted by the pastor, Rev J C Miller, assisted by several of the visiting clergymen, who were attending the convention of the Missouri Synod. The convention closed its session yesterday, and had been attended by twenty-six pastors.

Educational problems, particularly in outlying districts received much attention. The need of greater effort in behalf of religious and moral training of all children on the part of the church was urged. The Lutheran church is aware of the present tendency toward moral and spiritual integraiton in the world and it is determined to do its bit toward stemming the tide. It proposes to counteract the debasing influence of materialism by using every available opportunity of "training the child in the way it should go."

Professor Engelbrecht, instructor at a Chicago normal school, attended the conference and gave practical demonstration in Sunday school work, religious Saturday and summer school work.

A separate program of instruction and entertainment was carried out for the benefit of the visiting ministers' wives. This program included addresses by Dr. Geggie, The Young Mother and Her Child; Mrs. T. O. Herzer, A Trip to Europe; Professor Rehwinkle, M. A., B. D., Christianity and Civilization, with lantern slides; Professor Schwerman, of Concordia college, The Pastor's Wife; Mrs A Rehwinkle, M. D., Practical Demonstrations in Vegetable Canning and First Aid; Dr. Quesnel, Hygiene in the Home and Contagious Diseases.

LOCAL NEWS.

Dr and Mrs R A Walton returned last week from a week's visit with Dr Walton's parents at Jarvie.

Mr E Heichen returned last week from a vacation spent in the Mountains.

John Kulak, a graduate of Edmonton High, left Tuesday for Camrose, to attend Normal.

Henry Gabel arrived down from Junkins on Monday, Mr Kotscherofsky is expected down tomorrow.

Mr. and Mrs. Donaldson have moved back to Stony from their cottage at Edmonton Beach.

Mrs Witherspoon has resumed her duties at the Hardwick General Store.

Mr and Mrs J L Hollinshead are moving next week to the Zucht house.

Hugh McKinnon, Edson, well known here, was back in Stony this week.

Mr and Mrs C E Clarke returned Saturday afternoon from the East.

Mr Paul Werner, the popular insurance agent, has been appointed a Commissioner for Affidavits.

Monday next (Labor Day) will be observed as a general holiday.

The following pupils at the local school have been promoted to grade 9: Jean McMillan, Minnie Tesch, Cecilia Rivest, Len Ingle, Francis Couture.

The widening of the grade on the bridge south of town allowing autos to pass each other freely at this point, is looked upon as a big improvement.

Will the gent who, on leaving town early Sunday morning, took two lanterns from the guard rail at the bridge, kindly return same to the Mayor's office and get reward.

The Saturday special train to Wabamun and Seba has been discontinued. The last special to the Beaches will be run Monday next, Labor Day.

The local school opened on Monday morning, this year's staff consisting of the Misses Henry and E Hartley, and Messrs Clarke and Hollinshead.

St Matthew school reopens Tuesday next, Sept. 4.

Buy your school supplies at J. F. Clarke's Drug Store.

Max Meckleuburg, eyesight specialist, will be at Royal Hotel, Stony Plain, on Saturday, Sept. 8. Do not neglect your eyes.

I can provide you with a Life Assurance Policy to suit your particular needs. R. B. Brooks, local agent for The Sun Life Assurance Co.

Co-Operative Wheat Pools

With the abolition of the Wheat Board created under the stress of war conditions for the marketing of the wheat crop of Canada, and the unsettled state of world markets since then, the problem of marketing the wheat of this Dominion so as to bring an adequate return to the wheat growers has become more and more acute. Steps taken to revive the Wheat Board under peace conditions in 1922 and 1923 having ended in failure, despite all the efforts of the Western Provincial Governments, the farmers themselves are now engaged in the really formidable task of endeavoring to create co-operative pools to act as selling agents for all wheat consigned to them, the idea being that once these pools are successfully launched a joint selling organization will be set up to handle the export end of the business.

The first essential to the success of this new method of marketing is that at least one-half of all the wheat growers in each Province creating a pool shall by signed contract bind themselves to deliver all the wheat grown by them to the pool for a period of five years, and accept in payment therefor the average price realized in each selling season.

In a word, the proposal is that, instead of each farmer selling his wheat individually, fifty per cent. of them or more shall sell collectively. The small, pioneer farmer with only a few loads to sell, and the farmer having heavy liabilities to meet and who is therefore compelled to sell immdiately his wheat is threshed, is to be placed as nearly as possible on a basis of equality insofar as marketing is concerned with the large and well established farmer shipping wheat by the carload and who, by reason of his established position and credit, can choose the time of selling as prevailing market prices may dictate as being the most advantageous time to sell.

Under the plan proposed, instead of an enormous volume of wheat being thrown on the market under pressure by a large number of farmers early in the season, thus forcing down the price, the wheat will all pass through a co-operative pool and be handled by it so as not to "break" prices, and thus obtain the highest possible average price for all.

Whether this pooling arrangement will realize for the farmers all that is claimed for it is, of course, open to question. There are many who are skeptical, but unquestionably the vast majority of wheat growers, with the experience of the last few years fresh in their minds, are of the opinion that marketing conditions and price cannot be any worse than they have been, with the chances that they will be considerably improved under the pooling system.

There is, too, in some quarters objection to the binding nature of the contract stipulating that all wheat grown for a period of five years must be turned into the pool. However, those among the farmers most experienced in the business, and practically all the leaders in the farmers' movement and organizations are convinced after long study that a "contract" is an essential feature to success, and that a reasonable length of time is required to demonstrate the feasibility and success of the scheme. And inasmuch as those responsible for the management of the pool and the selling of the wheat must be in a position to make binding contracts with purchasers for given quantities of wheat, it stands to reason that, on their part, they must be protected by equally binding contracts for the delivery of wheat to them wherewith to fill such contracts. It is, therefore, a straight matter of business.

Under the proposed contract between the individual farmer and the pool, it is stipulated that the contract becomes binding and the pool becomes operative only in the event of at least fifty per cent. of the farmers signing up. And the signatures of this fifty per cent. must be obtained to contracts in the course of a few weeks if the pools in the various provinces are to become operative this year. There is, therefore, no time to be lost on the part of all farmers, business men, and others, who believe that this new method of marketing gives promise of success and a betterment to agricultural conditions throughout Western Canada.

Farmers are dissatisfied with present conditions, and no wonder. Business men are dissatisfied because if the farmers are not succeeding and prosperous, business in this country cannot succeed and prosper. All are in the same boat. Thousands believe the proposed pooling arrangement offers a solution, and they will not be satisfied until it has at least been given a fair trial. It would seem, therefore, to be the part of wisdom for everybody to get back of the pool, and put forth their best efforts, individually and collectively, to assist the Pool Committee to secure the necessary fifty per cent. signed contracts in good time to bring the pool into operation to handle the 1923 crop.

Airplanes Carry Supplies to Surveyors

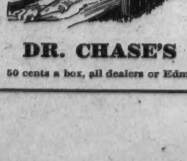
The Air Board and the geological survey were working hand in hand this summer in connection with the bringing in of supplies to surveying parties in Northern Canada. In the past it has been necessary to bring in supplies by pack or canoe, and portage from the end of the steel. Under the new arrangements, wherever possible, the airplanes of the board will transport the supplies.

Using Banff-Windermere Road

Since the opening of the Banff-Windermere road linking up the grand circle tour through the Canadian and American Rockies, there have been 1,089 cars over the road, according to a statement from the National Parks Department. Of this number nearly 500 were American. At the auto camp at Calgary, 4,600 tourists have been accommodated since July 1st.

"My Hands Trembled and I Could Not Sleep"

Mr. Thomas Honey, Brantford, Ont., writes:—



"When I began taking Dr. Chase's Nerve Food, I was so nervous that when I picked up a cup of tea my hand would tremble like a leaf. I could not sleep well, could not remember things, and there were neuralgic pains through my body. After taking seven boxes of Dr. Chase's Nerve Food, however, I am in perfect health."

The Price of Progress

Problem of City Noises is Growing All the Time

Scientists have begun to enquire as to whether the concentration of electric wires in the cities has an influence upon the nervous system of the urban dweller. Certainly, the concentration of noises in the city has a big influence.

Every new development which brings something worth while into the lives of the people takes tribute of their peace of mind. The modern problem of city noises is a big one and is growing all the time. A crusade for more quiet is a pressing need of the times.

For Constipated Bowels Smoothest Regulator Is Dr. Hamilton's Pills

No Headache, Biliousness, Sour Stomach Where They Are Used

Fine for Constipation!

They cleanse the Liver and Move the Bowels While You Sleep

Don't stay sick or ailing! Use this grand family remedy at once. It will give you spirits, ambition, appetite, good blood, better nerves—in short, good health. You can get all this in a 25c box of Dr. Hamilton's Pills. Sold by all dealers in medicine.

B.C. Leads in Fisheries

Canada's sea fish catch in 1922 amounted in value to $20,963,234, an increase of about $1,500,000 over the previous year. British Columbia stands first among the provinces in the proportion of the value of its sea fish catch, with Nova Scotia a close second and New Brunswick, Quebec and Prince Edward Island following in order stated. The principal British Columbia catch last year was salmon, with a value of $5,041,362. The halibut catch amounted to $2,563,000.

DELICATE GIRLS NEED NEW BLOOD

Rich, Red Blood Means Health and Strength

The anaemia of young girls may be inherited, or it may be caused by bad air, unsuitable food, hasty and irregular eating, insufficient out-of-door exercise and not enough heat and sleep.

It comes on gradually, beginning with languor, indisposition to mental or bodily exertion, irritability and a feeling of fatigue. Later comes the palpitation of the heart, headaches, dizziness following a stooping position, frequent backaches and breathlessness. In a majority of cases constipation is present. There may be no great loss of flesh, but usually the complexion takes on a greenish-yellow pallor.

Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drug, are just the tonic needed to remedy this wretched state of health. Though it is not noticeable, improvement begins with the first dose. As the blood is made rich the pallor leaves the face, strength and activity gradually return and the danger of relapse is very slight.

If any symptom of anaemia appears, prudence suggests that Dr. Williams' Pink Pills should be taken at once, and the sooner they are taken the more speedily will their action improve the blood. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Plans World Trip

Portuguese Flyer Expects to Spent 280 Hours in Air

Col. Saccadura Cabral, one of the Portuguese aviators who flew from Lisbon to Rio de Janeiro, referring recently to his project of flying around the world, said his itinerary would be divded into three parts.

The first would be from Lisbon to Japan, 9,870 miles; second, Japan to Newfoundland, 7,850 miles; third Newfoundland to Lisbon by way of Fayal and Punta Delgada, 2,140 miles.

On the basis of an average speed of seventy miles an hour, the aviator would expect to spent 280 hours in the air.

"Seems to me," said the ladder, "I'm always up against it."

Whales suffer a great deal from rheumatism.

Minard's Liniment for Sprains

Gasoline From Coal

Henry Ford Conducting Interesting Experiment at Detroit

A method of burning coal twice, and thus materially reducing the cost of automobile manufacturing, has been perfected by a firm of New York chemists, and taken over by Henry Ford, according to Emil Piron, who, with his associate, V. Z. Caracristi, conducted the experiments. "The method is practicable and is a success beyond all doubt," said Piron. Mr. Ford is now engaged in constructing buildings at Detroit, where the new process will be put into operation.

One of the principal by-products will be gasoline, which can be produced at an estimated cost of six cents a gallon. Thus the joys of motoring are likely to be brought into easy reach of nearly everybody in the country, if the new process proves workable when it is actually put into operation on a commercial basis.

Each ton of coal burned by Ford under this process will produce coke—with which he can make his own steel instead of buying it as at present—motor gasoline, lubricating oil, fertilizer, creosote, gas and grease, Diron said.

In other words as each "flivver" goes through the factory, its gasoline, oil and grease will be manufactured as a side line at hitherto unheard of prices.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Show Animals Become Scarce

High Prices Are Being Obtained For Wild Beasts

Wild animals cost a good deal of money at the present time. A giraffe bring about $5,000; hippopotamuses from $2,500 to $5,000, and good lions are worth $1,250 each. The principal reason is scarcity. Post-war conditions have interfered with the pursuit of the industry of providing wild beasts, the European centre of which is at Hamburg.

John Hagenback has applied to the British authorities for permission to send a party of German animal catchers to India, and hopes to head the expedition personally. In India he will visit his old friend the Majarajah of Gwalior, from whose reserves Mr. Hagenback, in previous years, has obtained many tigers. It was the Indian dignatary's chief grief that he had no lions. Mr. Hagenback sent him eight of the kings of the animal world. The lions increased so rapidly in the thick forests that they became the terror of the entire country and caused the Majarajah much litigation and annoyance.

The most obstinate corns fail to resist Holloway's Corn Remover. Try it.

Appoint "Radio Cops"

"Radio Cops" have now been appointed by the radio telegraphic branch of the Department of Marine and Fisheries for some 22 districts throughout the Dominion, scattered all the way from North Sydney to Vancouver. It is hoped in the near future to make appointments at Sarnia, Sault Ste. Marie, Regina, Edmonton and Lethbridge.

What a grand old world this would be if opportunity knocked at a man's door as often as the bill collector!

Elementary education in England, it is estimated, will cost $165,000,000 during this year.

RED RASH ON HANDS AND BODY

Itching and Burning Terrible. Cuticura Heals.

"I was troubled with eczema on my hands and body. It broke out in a red rash and later formed sore eruptions containing water. The itching and burning were terrible. My hands had to be bandaged, and my clothing aggravated the breaking out on my body. The trouble lasted about three months.

"A friend advised me to try Cuticura Soap and Ointment. I did and found they helped me, and after using two cakes of Cuticura Soap and two boxes of Ointment I was healed." (Signed) Mrs. Russell Hendsbee, Sand Point, Nova Scotia.

Cuticura Soap, Ointment and Talcum are all you need for every-day toilet and nursery purposes.

Sample Each Free by Mail: Address: "Cuticura, Limited, 344 St. Paul St., W., Montreal." Sold everywhere. Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Soap shaves without mug.

Senate Reform

Toronto Paper Would Like to See the West Put Forth a Definite Plan

The system we have is a poor one from every point of view, except that of the partizan who gets a senatorship conferred on him by the leader of his party. The man who gets the job is provided for, he has powers, privileges and perquisites, he has a nice salary for life. He can help make laws and help prevent the making of them, and the people of Canada have no control over him.

It has long been the contention of The Star that a second chamber is unnecessary and that it should not be reformed, but abolished. Fault is found with the present chamber that it is useless at best and mischievious at worst. If you reform it, change it, strengthen it, you but take from the House of Commons some part of its effectiveness in order to put life into the second chamber. It has seemed to us that a senate that is useless is a senate at its very best. But so many people are wedded to the idea that a second chamber must be maintained or the sky would fall, and as the senate persists in its failure to rest content with merely being useless, we would like to see the west put forward a definite plan of senate reform. People throughout Canada would, we feel sure, be keen to discuss it.—From the Toronto Star.

Relief from Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes! It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

New Financial Record

A new financial record was established by Canadian houses in absorbing immediately a bond issue of $22,500,000 for additional equipment on the Canadian National Railways. The bonds carry 5 per cent. interest and run for fifteen years. None of the money was raised from outside sources.

TRY IT!

Hundreds have found relief for Aches, Pains, Bruises and Cuts in Minard's.

MINARD'S "KING OF PAIN" LINIMENT

Always have Mustard on the table

It's not just custom that makes people take mustard with their meals. Mustard aids digestion and helps to assimilate the meats. It is a good habit to acquire. Mix it freshly for every meal.

but it must be Keen's

Canada's Inland Fisheries Are Shown To Be Of Considerable Importance

This summer the Dominion Government is undertaking a work of improvement and expansion of the inland fisheries of the Canadian Northwest by transferring vigorous but coarse species of fish from certain of the larger lakes to smaller prairie lakes, where there are at present no fish, in order to promote the increase of the more desirable varieties in the larger bodies of water. In the development of commercial fishing on these waters, suckers and other coarse fish have not proved sufficiently profitable to be fished, and attention has been directed to whitefish and other marketable varieties, with the result that the one has become seriously depleted and the other increased tremendously, with the situation aggravated by the fact that the suckers each year consume great quantities of whitefish eggs.

The Government is taking early precautions to safeguard the inland fishing industry of the Northwest. Fishing is only permitted in certain seasons of the year and each lake is allotted its quota of fish to be taken, and when the various companies engaged have depleted the waters to that extent, operations cease for the year. In this manner permanency is being given to an industry which has rapidly grown and has a promising future.

Though of comparatively recent origin, this fishing industry which is carried on on the lakes of Manitoba, Saskatchewan and Alberta has assumed substantial proportions. In the year 1922, Lake Winnipeg produced 1,500,000 pounds of whitefish in addition to large quantities of jackfish and tullibee. About $300,000 worth of fish is caught and marketed annually from the lakes of Saskatchewan, the species being mainly gold eyes, mullets, pike, sturgeon, trout and tullibee. Northern Alberta lakes, last year, yielded to commercial fishermen 1,750,000 pounds of whitefish, and 100,000 pounds of pickerel as well as other varieties, and exports from Edmonton amounted to 77 cars as against 69 cars in the previous year.

The fish of these northern lakes rapidly found markets in Eastern Canada and the United States and the demand is steadily increasing. Each month loads of fish packed from these inland lakes to the railhead by wagon or dog-team travel thousands of miles to New York or Chicago. Though there is no such feature as inexhaustibility about any lakes, and the number of fish in these waters is beyond computation at the present time, the Government is making wise provision to maintain them in their fertility.

Curing Hay In Damp Weather

Artificial Hay Drying Is Success In Great Britain

Making hay while the sun shines is out of date. Hay is now being grown in many parts of England by methods over which the weather clerk has no control.

In these advanced sections, the grass is gathered, perhaps in a damp state, as soon as cut and crammed into a rick in the stack yard.

An electric fan does the rest.

When the rick is built a metal cylinder is inserted so that an air cavity is formed. This cavity will serve a 30-ton rick to insure the safety of the curing and cooling process. A fan is placed in the cavity and dries out the grass and keeps it from rotting.

It is claimed that not only do the farmers save the possible loss of their crops through bad weather, but analysis shows that hay dried in the rick has a higher percentage of albuminoids and carbo-hydrates, and therefore increased feeding value.

The new method has been tried and approved by the Ministry of Agriculture and the ricks are appearing in all sections of England and Scotland.

Indignant Young Thing.—I've brought back this bathing suit. I never saw such a thing in my life. I was only in the water an hour and it had already shrunk five inches.

Modest Clerk (carefully considering the garment).—Lady, it's a good thing you came out when you did.

Turning to Dairying

Western Farmer Beginning to Realize That the Dairy Brings a Constant Revenue

That the west is fast turning to dairying was never more exemplified than at the recent summer fairs where inquiries for dairy cows were heard on all sides. Why is this? Because the dairy brings a constant and sure revenue. Although the price of butter fat was running lower than for some years, yet there was a reasonable return for the labor expended. Then, too, it is considered that dairying will bring greater prosperity and give more permanency to farming in the west and thus will a great country be built up on solid lines.

Many a farmer went to the west a few years ago firmly of the opinion that he could make more money growing grain than raising cattle. He had resolved never to milk cows again—at all events not for a living. It was, "good-bye dairy business" for ever—so he thought. But experience is a great teacher—not theorizer. The result is, as reported by W. F. Stephen, Secretary of the Canadian Ayrshire Breeders' Association, who has been attending the western exhibitions during July, that the prairie farmers' slogan now is, "we've got to milk cows."

Changing conditions have forced the farmer to this new policy. Wheat growing, he says, has become little less than a gamble—one good, paying crop, in some localities in three to five years. "The low prices for wheat, horses, beef, wool and mutton," says Mr. Stephen, "have turned many of the producers of these to incorporate into their system of farming a few head of dairy cattle. This has created a phenomenal demand and in my many trips to Western Canada never did I find such a demand for good Ayrshire grades, as well as pure breds. Something that will give milk is wanted and of good size.

Another Fox Farm For Calgary

Calgary will soon have three black fox farms. The latest to be established is that of A. E. B. Murphy, son of Senator P. C. Murphy, of Prince Edward Island.

Exhibit Will Be Creditable

Canada's Contribution May Be Gem of Empire Exhibition

"That is an entire mistake," was the comment of J. S. McKinnon, of the Canadian Government Exhibition Commission, when referring to cable dispatches that there had been some criticism in England that Canada was letting Australia get ahead of her in preparation for the British Empire Exhibition at Wembley next year.

"We have not been using brass band methods in Canada, but we have been steadily at work and have been getting splendid results," Mr. McKinnon said. "It is safe to say that when the time comes Canada will be just as well represented at the Empire Exhibition as Australia or any other part of the Empire. In fact, from the interest that has been displayed by Canadian manufacturers I should not be surprised if the Canadian exhibit proved the gem of the whole exhibition, as the Canadian building certainly will be."

Making Money From Tourists

Over $200,000 Collected Yearly at Shakespeare's Birthplace

The municipality of Stratford-on-Avon, Shakespeare's home town, makes over $200,000 a year by way of small admission fees to his birthplace and other points of interest. In addition to that, much more money is made by the hotels, which are constantly filled with visitors, many of them being wealthy Americans and Canadians who spend very freely. All the tradesmen who sell souvenirs do an enormously profitable business. Then there are thousands of daily trippers who spend money.

Dairying Makes Headway

Alberta Operating Fifteen More Creameries Than Last Year

The dairy industry continues to make headway in the province of Alberta, 15 more creameries being in operation this year than in 1922. It is estimated the total creamery butter production will be about 18,000,000 pounds, 3,000,000 more than last year. There is a considerable increase in the acreage of fodder crops, particularly in corn.

Pekin is to have broad-wheeled carts with tires 4½ inches wide to replace the 1½ inch tires of the Pekin two-wheeled, springless carts which have been cutting up the roads for centuries.

The Important Work Of Defining Boundaries Between United States And Canada

The prime importance of having the boundaries of an individual's real property accurately surveyed and defined both by marks on the ground and by description on paper, and a record of the same properly registered and acknowledged is everywhere recognized. As with the individual so, but in a correspondingly greater degree, with the nation. The duty of delimiting and marking the boundaries between Canada and the United States is now placed upon the International Boundary Commission composed of two commissioners, one representing each country.

This work is undertaken under the authority of certain treaties and conventions entered into by Great Britain and the United States. The defining of the Alaskan coast boundary was done under the Convention of 1903; the work on the 141st Meridian from the Arctic Ocean to Mount St. Elias, (the boundary between Alaska and the Yukon) under the Convention of 1906; and that on the boundary from the Atlantic Ocean to the Pacific Ocean under the Treaty of 1908.

The principal requirements of these treaties or conventions are that the land boundary shall be marked by durable monuments at frequent intervals; that the water boundary shall be referenced by monuments on the shore; that the boundary line shall be drawn by the commissioners on accurate, modern maps, and that a point report describing the boundary line, monuments, and operations shall be submitted at the close of the work.

As no maps were in existence of sufficient accuracy for the laying down of the International Boundary line, it was necessary to make them, involving the extension of a belt of triangulation along the boundary line to determine the geographic positions of the monuments and to control the topographic work. The work included the precise measurement of base lines. Levels had to be run to fix elevations and a belt was accurately mapped extending from half a mile to two miles on either side of the boundary line for its entire length. It was also necessary in places to make soundings in the water area traversed by the line.

From the Arctic Ocean, the boundary line between the United States and Canada extends south 645 miles along the 141st Meridian to Mount St. Elias, and parallels the Pacific Ocean a short distance inland and through the Portland Canal for a distance of 862 miles. Then from the entrance to the straits of Juan de Fuca, the boundary extends eastward 3,900 miles across the continent to the mouth of Passamaquoddy Bay on the Atlantic coast. The first stretch of this extends along the 49th Parallel from the Pacific Ocean to the Lake of the Woods and thence to Lake Superior, a distance of 1,668 miles, then through the Great Lakes and the St. Lawrence River for 1,250 miles and from the St. Lawrence to the Bay of Fundy, a distance of 775 miles. Of the 1,500 miles of the Alaskan boundary, 180 miles are water and so are 2,100 miles of the 3,900 miles from the Pacific to the Atlantic Ocean.

The surveys were executed throughout with a scientific accuracy befitting the boundary between sovereign states. The expense is divided equally between the two countries. The operations consist of reconnaisances, secondary, and tertiary schemes of triangulation to locate the monuments and to control the topography.

A twenty-foot sky-line was opened through the timber wherever encountered on the line, much of this work being very arduous owing to the rough, mountainous character of the country. The line proper has been marked by permanent cement and metal monuments and permanent marks have been set at triangulation points.

The work of this commission furnishes three long, accurately measured, and permanently marked bases which will serve to control future surveys and to co-ordinate existing surveys. The sections across the continent are tied to and controlled by the work of the Canadian and United States Geodetic Surveys. Part of the record of the work consists of 290 topographical maps, the preparation, engraving and printing of these being not the least formidable of the commission's tasks. The geographic positions of all monuments and triangulation stations are computed, and information is supplied on request to many federal and provincial government departments, as well as to many organizations ouiside of these.

Natural Resources Bulletin

Flax Seed Industry is Reaching Substantial Proportions

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa, says:

The prairie provinces during the past five years produced 5,730,000 bushels of flax seed; per year, a large proportion of which is used in the making of linseed oil. A report of production of this oil for 1920 shows that there are eight mills in Canada crushing flax seed, of which Manitoba has two, Alberta one, Ontario two, Quebec three. There were used 1,527,096 bushels of seed, from which were produced 2,627,265 gallons of linseed oil, 798,975 gallons of boiled linseed oil, and miscellaneous products, including oil cake and meal, to the value of $2,149,903. The capital invested in the industry was $2,911,634, and the number of employees 214. Last year imports amounted to but 1,173,454 pounds, whereas in 1921 there was 5,965,926 pounds imported.

Nine Thousand More Farms

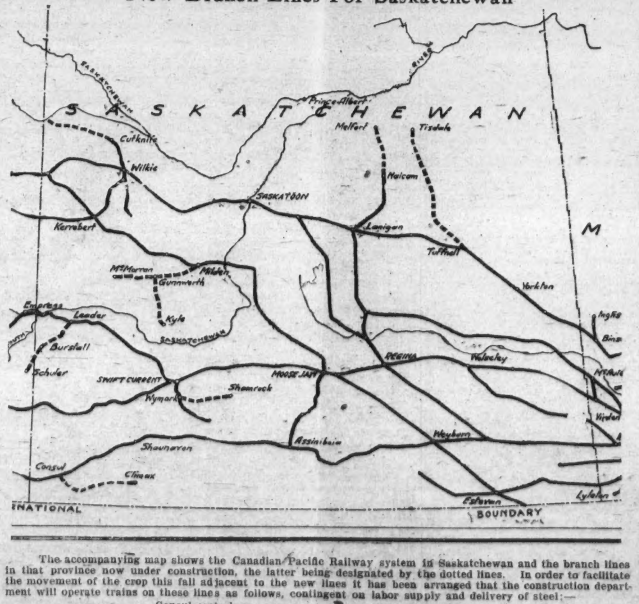
Over Fourteen Million Acres Now Occupied In Manitoba

The increase in the number of farms in Manitoba in the last decade has been about 9,000, according to census figures, or at a rate of nearly 1,000 a year. The province has now more than 53,000 occupied farms with an area of over 14,600,000 acres, the average size of the Manitoba farm being 274.3 acres. The value of all farm property in the provinces, based on the census of 1922, is placed at $656,500,961.

The sign read: "You must not go through the village at a speed exceeding 15 miles per hour."

Underneath was written: "Or you'll break your springs."

New Branch Lines For Saskatchewan



The accompanying map shows the Canadian Pacific Railway system in Saskatchewan and the branch lines in that province now under construction, the latter being designated by the dotted lines. In order to facilitate the movement of the crop this fall adjacent to the new lines it has been arranged that the construction department will operate trains on these lines as follows, contingent on labor supply and delivery of steel:—

Consul easterly	Sixty miles
Leader southwest	Twenty-five miles
Milden to end of Rosthern south	Seventy-nine miles
Nalcam to Melfort	Thirty-two miles
Tufnell-Prince Albert	Fifty miles
Wymark-Archive	Thirty-five miles

Operation of the Cutknife-Battle River line, forty miles, and the second section of the line from Leader southwest, twenty-five miles, will depend entirely on whether track material can be delivered in time to get steel laid.

Straight Talk On Danger Of Colds

Let your cold gain headway, and you can't keep it from running into Catarrh.

Catarrh never stays in the same place—it travels down into the lungs—then it's Consumption.

Drive colds and Catarrh right out of your system while you have the chance.

Easily done by inhaling CATARRHOZONE, which instantly reaches the true source of the trouble and gets right where the living germ of Catarrh is working.

CATARRHOZONE is full of healing balsams and essences, and is able to patch up the sore spots and remove that tender, sensitive feeling from the nose and throat.

Hawking and spitting cease, because the discharge is stopped. The nostrils are cleared, headache is relieved, breath is purified. Every trace of Catarrh, bronchial and throat weakness is permanently removed.

Get CATARRHOZONE today; months' treatment $1.00; small size 50c. Sold by all druggists, or by mail from The Catarrhozone Co., Montreal.

CHAPTER XXII.

Church-Going Clothes

After his few words to Dorothy the wounded man lapsed again into coma, in which condition he was found by the physician, who returned with Santry from Crawling Water. During the long intervening time the girl had not moved from the beside, though the strain of her own terrible experience with Moran was making itself felt in exhaustive fatigue.

"Go and rest yourself," Santry urged. "It's my turn now."

"I'm not tired," she declared, trying to smile into the keen eyes of the doctor, who had heard the facts from the old plainsman as they rode out from town.

Wade lay with his eyes closed, apparently in profound stupor, but gave signs of consciousness when Dr. Catlin gently shook him. Dorothy felt that he should not be disturbed, although she kept her own counsel, but Catlin wanted to see if he could arouse his patient at all, for the extent of the injury caused by the bullet, which had entered the back in the vicinity of the spinal cord, could be gauged largely by the amount of sensibility remaining. The wounded man was finally induced to answer monosyllabically the questions put to him, but he did so with surly impatience. The physician next made a thorough examination, for which he was better fitted than many a fashionable city practitioner, by reason of his familiarity with wounds of all kinds.

When he arose Santry, who had watched him as a cat watches a mouse, forced himself to speak, for his throat and mouth were dry as a bone.

"Well, Doc, how about it?"

"Oh, he won't die this time; but he may lie there for some weeks. So far as I can tell the bullet just grazed the spinal cord, and it's the shock of that which makes him so quiet now. A fraction of an inch closer and he would have died or been paralyzed, a cripple, probably for life. As it is, however, barring the possibility of infection, he should pull through. The bullet passed straight through the body without injury to any vital organ, and there is no indication of severe internal hemorrhage."

Santry moistened his lips with his tongue and shook his head heavily.

"What gets me," he burst out, "is that Gawd A'mighty could 'a' let a skunk like Moran do a thing like that! And then"—his voice swelled as though the words he was about to utter exceeded the first—"and then let the varmint get away from me!"

Dr. Catlin nodded sympathy with statement and turned to Dorothy. She had been anxiously searching his face to discover if he were encouraging them unduly, and when she felt that he was not stretching the facts a tremendous weight was lifted from her mind.

"You are going to stay here?" he asked.

"Yes; oh, yes!" she answered.

"That's good." He opened his medicine case and mixed a simple antipyretic. "I'll explain what you're to do then. After that you better lay down and try to sleep. Wade won't need much for some days, except good nursing."

"I'm not tired," she insisted, at which he smiled shrewdly.

"I'm not asking you if you're tired. I'm telling you that you are. Those nerves of yours are jumping now. You've got our patient to consider first, and you can't look after him unless you keep well yourself. I'm going to mix something up for you in a few minutes and then you're going to rest. A nurse must obey orders."

He explained to her what she was to do for the patient and then gave her something to offset the effects of her own nervous shock. Then counseling them not to worry too much, for there would be no fatal result if his directions were followed, the physician mounted his horse and rode back to town. Such journeys were all in the day's work to him, and poor pay they often brought him, except as love of his fellow-men rewarded his spirit.

During the long days and nights that followed, Dorothy scarcely left Wade's bedside, for to her mother now fell the burdens of the ranch household. From feeling that she never would be equal to the task of caring for so many people, Mrs. Purnell came to find her health greatly improved by her duties, which had left her no opportunity for morbid introspection.

Santry, too, was in almost constant attendance upon the sick man, and was as tender and solicitous in his ministrations as Dorothy herself. He ate little and slept less, relieving his feelings by oaths whispered into his mustache, and he and Dorothy made move about their various duties as quietly as mice. Dorothy grew to be genuinely fond of him, because of their common bond of sympathy with Wade. Frequently they sat together in the sickroom reading the newspapers, which came out from town each day. On one such occasion, when Santry had contorted his mouth awry in a determined effort to fold the paper he was reading without permitting a single crackle, she softly laughed at him.

"You needn't be so careful. I don't think it would disturb him."

The old fellow sagely shook his head.

"Just the same, I ain't takin' no chances," he said.

A moment afterward he tiptoed over to her, grinning from ear to ear, and with a clumsy finger pointed out the item he had been reading. An expression of pleased surprise flooded her face when she read it; they laughed softly together; and, finding that he was through with the paper, she put it away in a bureau drawer, meaning to show that item some day to Gordon.

Under the care of Dr. Catlin who rode out from Crawling Water each day, and even more because of Dorothy's careful nursing, the wounded man was at last brought beyond the danger point and started on the road to health. He was very weak and very pale, but the one danger that Catlin had feared and kept mostly to himself, the danger of blood-poisoning, was now definitely past, and the patient's physical condition slowly brought about a thorough and complete recovery.

"Some of it you owe to yourself, Wade, as the reward of decent living, and some of it you owe to the Lord," Catlin told him smilingly. "But most of it you owe to this little girl here." He patted Dorothy on the shoulder and would not permit her to shirk his praise. "She's been your nurse, and I can tell you it isn't a pleasant job for a woman, tending a wound like yours."

"Is that so?" said Dorothy, mischievously. "That's as much as you know about it. It's been one of the most delightful jobs I ever had."

"She's a wonderful girl," said Wade, with a tender look at her, after they had laughed at her confusion.

"Oh, you just think that because I'm the only girl around here," she blushingly declared, and the physician kept right on laughing.

"There was another girl here once," said Wade. "Or at least she acted somewhat differently from anything you've done lately."

He was well enough now to receive his friends on brief visits, and Trowbridge was the first to drop in. Dorothy did not mind having Lem, but she was not sure she enjoyed having the others, for she had found the close association with Gordon so very sweet; but she told herself that she must not be foolish, and she welcomed all who came. Naturally so pretty a girl doing the honors of the house so well, and so closely linked with the fortunes of the host, gave rise to the usual deductions. Many were the quiet jokes which the cattlemen passed among themselves over the approaching wedding, and the festival they would make of the occasion.

"Well, good-by, Miss Purnell," said Trowbridge one day, smiling and yet with a curiously pathetic droop to his mouth.

"Miss Purnell?" Dorothy exclaimed, in the act of shaking hands.

"That's what I said." He nodded wisely. "Good-by, Miss Purnell." Refusing to be envious of his friend's good fortune, he wished cheerily and was gone before she saw through his little joke.

The next afternoon she was reading to Gordon when the far-away look in his eyes told her that he was not listening. She stopped, wondering what he could be dreaming about, and missing the sound of her voice, he looked toward her.

"You weren't even listning," she chided, smilingly.

"I was thinking that I've never had a chance to get into those church-going clothes," he said, with a return of the old whimsical mood. "But I look pretty clean, don't I?"

"Yes," she answered, suddenly shy. "Hair brushed? Tie right? Boots clean?"

To each question she had nodded assent. Her heart was beating very fast and the rosy color was mounting to the roots of her hair, but she refused to lower her eyes in panic. She looked him straight in the face with a sweet, tender, cool gaze.

"Yes," she said again.

"Well, then, give me your hand." He hitched his rocker forward so as to get closer to her, and took both her hands in this. "Dorothy, I've got something to tell you. I guess you know what it is." Her eyes suddenly became a little moist as she playfully shook her head. "Oh, yes, you do, dear but I've got to say it, haven't I? I love you, Dorothy. It sort of chokes me to say it because my heart's so full."

"Mine is, too," she whispered, a queer catch in her voice. "But are you sure you love me?"

"Sure? Why, that other was only . . ."

Withdrawing her hands from his, she laid her fingers for an instant on his lips.

"I want to show you something," she said.

She went to the bureau, and taking out the paper which she had hidden there, brought it to him. It was a moment before she could find the item again, then she pointed it out. They read together, as she and Santry had done the first time she had seen it. The item was an announcement from the Rexhills of the engagement of their daughter Helen to Mr. Maxwell Payne.

Dorothy watched Wade's face eagerly as he read, and she was entirely content when she saw there no trace of his former sentiment for Helen Rexhill. He expressed genuine pleasure that Helen was not to be carried down with her father's ruin, but the girl knew that otherwise the news had left him unfeeling. She had always thought that this would be so, but she was comforted to be assured of it.

"Why, that was only an infatuation," he explained. "Now I'm really in love. Thank Heaven, I . . ." When she looked at him there was a light in her glorious violet-shaded eyes that fairly took his breath away.

"Hush, dear," she said softly. "You've said enough. I understand, and I'm so . . ."

The rest was lost to the world as his arms went around her.

The End

WANTS TO HELP OTHER WOMEN

Grateful for Health Restored by Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for backache and for weak and dreary feelings caused by my condition. Sometimes I felt so bad that I couldn't do my housework. My neighbor told me of your medicine and I read about it in the 'Toronto Telegram' and thought I would take it. I got very good results. It built me up and I have told several friends what it has done for me. You may use this testimonial as it may be of help to some one who has suffered as I have."—Mrs. J. LEE, 25 Harvie Ave., Toronto, Ont.

Mrs. Lee is willing to write to any girl or woman suffering from such troubles, and answer any questions they may like to ask.

Women suffering from female troubles causing backache, irregularities, pains, bearing-down feelings and weakness should take Lydia E. Pinkham's Vegetable Compound. Not only is the worth of this splendid medicine shown by such cases as this, but for nearly fifty years letters like this have been received from thousands of women.

You might be interested in reading Mrs. Pinkham's Private Text-Book upon the "Ailments of Women." You can get a copy free by writing the Lydia E. Pinkham Medicine Co., Cobourg, Ontario. C

Keep it ready to serve at home

When it is ice-cold, nothing else is so sure to please—at home parties, when unexpected guests drop in and for just the family. And nothing is more convenient to serve—ordered by the case from your dealer like groceries, and a few bottles kept on ice in your refrigerator.

More and more a favorite every year for 22 years—since the first Canadian plant was established in Toronto in 1901.

Choicest products from nature make it wholesome. Our sanitary plant, with sterilized bottles, makes it pure.

Drink

Coca-Cola

Delicious and Refreshing

THE COCA-COLA COMPANY

Toronto, Montreal, Winnipeg, Vancouver

Japs Object to Private Radio

Military Officials Fear Confidential Messages Would Be Deciphered

Efforts of a private wireless corporation to popularize radio in Japan are being met by the opposition of Japanese military authorities.

Officials of the military department fear that should a private wireless tower be erected official messages of a strictly confidential nature would be picked up and deciphered. The opposition has relaxed somewhat, however, following the undertaking of the company to instruct its operators to make no effort to tune in on the government radio and to dismantle its plant and, voluntarily go out of business should this agreement be broken.

The promoters of the radio in Japan believe they can convince the authorities that such a project as they contemplate would bring immense benefits to the Japanese people in the form of entertainment, education and culture, and that for this reason their plans should be allowed to progress without interruption.

Gin takes its name from Geneva, where it was first distilled.

Great Soldier and Hero

Justice and Courage Were Qualities of Sir John Moore

A statue of General Sir John Moore was recently set up in the town of Shorncliffe, Kent, England. It will remind Britishers of a fine man and a hero, but it is an emblem of something more, of something that has made Britain great—goodness, justice and courage—qualities which met in the heart and soul of the great soldier. The story of his deeds at Corunna is forever set in our minds by the fine poem, "The Burial of Sir John Moore."

It is not alone for his war record however that he is enshrined in the hearts of his countrymen. He is remembered above all things as a reformer of the army, one who swept away wrongdoing, injustice and brutality from the regiment with which he had to deal, and one who, in his own life, was a model of the discipline he imposed.

Don't wait until tomorrow to neglect today.

A bore is a man who has nothing to say and insists upon saying it.

Makers Of Violins

Bavarian Village Turns Out Bulk of World's Supply

In the village of Mittenwald, in the heart of the Bavarian highlands, live the men who manufacture the greater part of the world's supply of violins. Mittenwald has taken the place of Cremona. Of the 1,800 inhabitants of the village, over 800 are exclusively occupied with the manufacture of violins, and the output reaches 50,000 violins per annum. They are exported to all the countries of the world. Each family of violin makers has its own particular trade secret, a sort of trick of the trade, handed down from father to son, but for general instruction in violin making an interesting school is carried on in the village.

What He Wanted to Know

A Scottish farmer met his minister one day and said: "I see ye hae got back frae the Holy Land, sir." "Yes, John," was the reply; "back again, safe and sound, as you see." "Man, I've often thocht," said the farmer, "I wad like to hear o' that place frae ane who has seen the country." "Well," was the reply, "I saw Lebanon, Jerusalem, Jericho, and the Jordon, and was up Mount——" "Excuse me interrupting you," said the farmer; "but if it's a fair question, hoo were the turnips lookin' about the Jordan an' the Dead Sea?"

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Wheat Pool In Saskatchewan Will Have Wide Powers

Regina.—Wider powers than are covered in the contract are provided for the Saskatchewan wheat pool in the memorandum of association which was approved by the wheat pool committee after an entire evening had been spent discussing the various features contained in the draft document.

The memorandum of association provides for a capitalization of $100,000, divided into 100,000 shares of one dollar each, and the registered office of the company is to be located in Regina.

Among other things the memorandum of association gives the pool power to manufacture, buy and sell flour and other food products manufactured from grain and cereals; power to acquire or build elevators, mills, warehouses, factories, plants, offices and houses and to purchase, build, hire or charter steamships and other vessels. The memorandum also contain provisions empowering the pool to borrow and invest money and to take over other companies or enter into agreements with other companies.

A clause is included giving the pool the right to join forces with other grain marketing organizations in other provinces.

The memorandum gives power "to provide for the government and control of the company by delegates to be appointed by the shareholders of the company in such as may be decided upon and particularly to provide for the postcard system of electing such delegates."

Other clauses give power "to provide for the appointment of directors of the company by districts" and to provide for the recall of directors and for the taking of referendums of the shareholders "particularly by postcard ballot or local meeting or both."

In reply to a telegram from W. R. Wood, of the U.M.M., asking if the Saskatchewan wheat pool would be willing to co-operate with Manitoba in a point selling agency, A. J. McPhail wired the following:

"Principle of inter-provincial selling agency of more importance than percentage of Manitoba's crop signed up for pool. Saskatchewan will welcome Manitoba's co-operation in establishing selling agency for the three provinces."

Terminal Elevators Want Rates Raised

Request of Operators at Lake Head Will Be Considered

Winnipeg.—An increase of one-half cent per 100 pounds on the elevator charges on mixed grains was asked for by the terminal elevator operators at the head of the lakes when their representatives appeared before a session of the Board of Grain Commissioners here.

Handling charges on mixed grains, receiving, elevating, storing, spouting and insurance against fire for the first 15 days is at present two cents a 100 pounds. Leslie Boyd, K.C., chairman, said the board would consider the application. There were no representations made with regard to other elevator charges.

Telegraph Slower Than Mail

Depreciation in Mark Increased Business on German Lines

Berlin. — Telegraphic communications in Germany, have been swamped ever since the mark began its downward swoop. Since January of this year the amount of business handled by the German telegraphic lines has been double that of the corresponding period of last year.

Telegrams now travel more slowly in Germany than letters, and the telegraph administration has appealed to the public to equalize its business and use the wires as sparingly as possible.

Will Scrap Warships

Tokio.—Official announcement was made that the scrapping of warships in accordance with the Washington treaty, ratification of which has just been exchanged by the signatory powers, would be carried out immediately.

W. N. U. 1487

France Refuses To Evacuate Ruhr Valley

No Change in Position Until Germany Pays Reparations

Paris.—Germany can obtain evacuation of the Ruhr only by paying reparations, she can secure attenuation of the rigors of the occupation by ceasing passive resistance and she can win no reduction in the amounts she owes France unless the allied creditors of France see fit to give France credit for equal amounts on her war debts.

These are the conclusions of Premier Poincare's reply to Marquis Curzon's reparations note of recent date. The French Government also expresses its belief that the Allies can agree on methods of bringing about the execution of the treaty by continuing courteous negotiations.

The British proposal for a re-estimate of Germany's capacity for payment and Lord Curzon's suggestion that the question of the legality of the occupation of the Ruhr be referred to the Hague are rejected and the French position is reaffirmed as remaining unchanged.

As for the inter-allied war debts, France holds that a settlement of this question should wait upon final payment by Germany of fifty billion gold marks in reparations comprised in the A and B bonds.

Five Million For Charity

Bucharest.—A bequest of 1,000,000,000 lei (about $5,500,000) left by Jacques Elias, a Jewish millionaire, for Rumanian cultural and charitable purposes, has been formally handed over to the Rumanian Academy, and the distribution of the fund will be started in October. None of the heirs appealed against the will.

Wounded Messenger Recovers

Toronto.—David Campbell, the Sterling Bank messenger, who was shot through the body by the bandits who robbed messengers of $83,000 here on July 24, has recovered sufficiently to leave the hospital. The condition of the messengers, Duck and Harris, still remains unchanged.

WESTERN EDITORS

C. McMurchy, Editor and Proprietor of The Herald, Saltcoats, Sask.

Ship Butter Via Panama

Several Thousand Boxes of Alberta and Saskatchewan Product Going to Britain

Vancouver—A trial shipment of several thousand boxes of Alberta and Saskatchewan butter will be exported to the United Kingdom in a few days by way of British Columbia and the Panama Canal.

Arrangements for the shipment were completed by P. Palleson, General Manager of the Central Creameries, and President of the Alberta Dairymen's and Manufacturers' Association. The rate to Liverpool, via the Panama Canal, has been cut in half, from $3 to $1.50 a hundred, this rate making the cost per hundred pounds via the canal $1.77 cheaper than by the Montreal route, it is stated.

If the trial shipment is successful, it is expected the transportation of dairy produce from the prairies through British Columbia will develop into large proportions.

Geddes Will Return If Possible

London.—The secretary of Sir Auckland Geddes, British Ambassador to the United States, who has been in England for two months, stated that Sir Auckland fully intended to return to his post at Washington unless the state of his health prevents.

Protest Against Report That British Harvesters Were Left Stranded

Reparations Problem

British Government In No Mood to Brook Further Delay

London.—London in August is comparatively dead, politically and diplomatically. Hence, it is difficult to gather any official opinion on the last note of M. Poincare, the French Premier, with regard to the German situation. A point much discussed in London is whether the note will lead to another allied conference in Paris or elsewhere, in an endeavor finally to settle the reparations problem.

The general view here is that this was one of the principal objects M. Poincare was aiming at in his latest exposition of France's policy, but in this connection it was pointed out that Premier Baldwin, in recent statements in Parliament and elsewhere, made the assertion that the British Government was not in a mood for much further delay in settling the issue.

Turkey Will Ratify Lausanne Treaty

Grand National Assembly at Angora Is Discussing Terms

Constantinople.—Debate on ratification of the Lausanne peace treaty is proceeding in the Turkish Grand National Assembly at Angora, and while the end of the discussion is not in sight, ratification of the pact is regarded as certain.

In favoring endorsement of the work of the negotiators at Lausanne, Yusuf Kemal Bey, President of the commission of foreign affairs, referred to the treaty as a document of life for Turkey. He declared it was entirely due to the works of Mustapha Kemal Pasha.

Arab University in Jerusalem

Jerusalem.—An Arab university will be founded in Jerusalem. The patriarch Barlassina is heading the movement for the establishment of the school, which will use both English and Arab tongues for instruction. Preparatory classes are announced to begin this year.

Winnipeg.—An indignant protest against the published reports that British harvesters were being left stranded and jobless in Western Canada was voiced here by Major L. F. Howard, Superintendent of Immigration in Western Canada, who said he considered the reports that British harvest workers had been "lured" to Canada under false pretences and left jobless, to be mischievous, misleading, inaccurate, and liable to do incalculable harm," as such reports would no doubt be reproduced in British papers and would be a "black eye for Canada."

"The reports are liable to interfere seriously with the regular immigration to this country and render it impossible to secure harvest help from Great Britain should their services be required again," Major Howard told the Canadian Press.

"Probably there were a few British harvesters stranded temporarily—just as there have been some stranded here—but they are at work now if they want to be," declared William Carnill, Superintendent of the Calgary Labor Office, and in charge of Alberta harvest employment here, who, along with the Saskatchewan representative, said reports that the men were stranded and without jobs were without foundation. According to the Alberta and Saskatchewan officials, 8,000 men still are needed. They declared jobs are waiting for them, regardless of previous experience and all other considerations except their ability to stand the test of hard work.

"As for experience being requisite to a job, I don't believe it," said Mr. Carnill. Thousands of men take on the harvest for the first time every year, and thousands of them make good at it. Of course, there are failures in every lot."

Collins' Memory Honored

Military Parade In Dublin Nearly Ten Miles Long

Dublin.—The anniversary of the death of Michael Collins was observed with military displays in Dublin, Cork, Waterford and other cities. The parade in Dublin was the greatest military spectacle ever seen here. All branches of the service were represented in a line extending nearly 10 miles.

When the head of the procession passed the cenotaph, Miss Kitty Kiernan, to whom the late leader was betrothed, placed a wreath on the tomb.

Artists Demand Daily Pay

Fluctuation in Exchange Makes Big Difference in Salary

London.—Singers and actors in the countries affected by the slump in exchanges have adopted a new method of collecting their salaries. The artists now demand that they be paid at the conclusion of each day's work, and at the rate of exchange paid for seats that day.

The artists have refused to sign contracts except on this basis, as they claim that the fluctuation of the exchange makes their salary practically nothing at the end of the month.

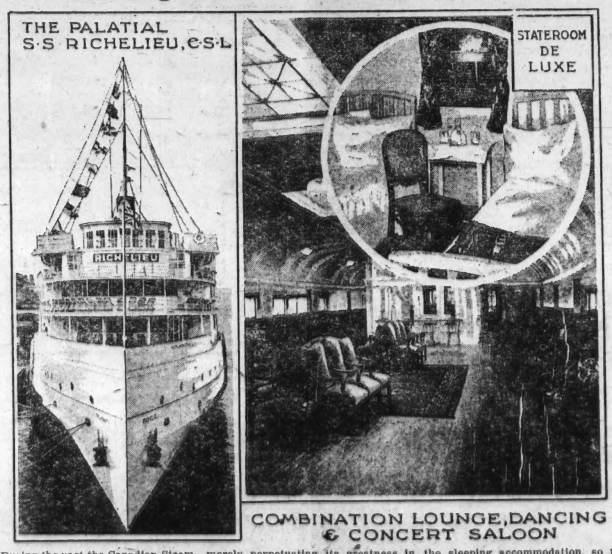
Canadian Dairymen Need Better Methods

Have Keen Competition in New Zealand and Australia

Ottawa.—A strong warning to Canadian dairymen of the need of better methods to meet the competition of New Zealand and Australian cheese and butter is given by J. A. Ruddick, Dairy and Cold Storage Commissioner of the Dominion, in a bulletin just issued by him as a result of his recent visit to the Antipodes to study the dairy industry there.

San Francisco.—San Francisco moved nearly four days' travel nearer to New York through the success of the air mail service's first test of night flying, westbound. Pilot C. K. Vance brought more than 400 pounds of mail from eastern points here, 34 hours and 23 minutes after the first batch of it had left Long Island.

Floating Palace on the St. Lawrence



COMBINATION LOUNGE, DANCING & CONCERT SALOON

During the past the Canadian Steamship Lines have always been the pioneers in placing at the disposal of the public palatial river steamers, which have provided passengers with all the comforts that it was possible to obtain abroard ship. The introduction of the S.S. Richelieu into the service, however, has outclassed any previous effort on the part of the company in this direction. The S.S. Richelieu is well named. It was a great, honored and proud name in the history of France, and the company is merely perpetuating its greatness in the river steamer which bears Cardinal Richelieu's name. The vessel is not only great, but palatial, and its magnificence reflects credit on its builders, especially when considering that it is the work of Canadians. It is undoubtedly the last word in de luxe construction, and was built at Lauzon, by the Davie Shipbuilding Co.

The Richelieu is constructed along lines for the comfort of its passengers, inasmuch as the amusement and social rooms are entirely separate from the sleeping accommodation, so that the early retiring birds may secure rest without fear of being disturbed by the joviality of their fellow travellers.

Oil burner engines have been introduced, which is another step in the direction of advancement, and insures a maximum of cleanliness. Her dimensions are: Length over all, 322 feet; beam over guards, 56 feet; moulded depth, 21 ft. 6 in.; steam is supplied by six Scotch cylinders triple expansion type and develop 4,500 horsepower.

Here and There

Nearly four thousand men were recruited by the Canadian Pacific Railway agents in England for work in the harvest fields of the Canadian West.

A sudden demand for wheat in Scandinavian markets has caused increased activity in the movement of grain through Vancouver. Four boats left with bulk wheat for ports of Norway and Sweden, marking the first direct grain shipments from the Canadian Pacific coast to Scandinavia.

The rapid increase in the export butter trade of Saskatchewan during the past year or two has been the outstanding feature of the provincial dairy industry. Recently the Saskatchewan Co-operative Creameries made a shipment of 25,000 lbs. of butter to China.

The export of gold bullion, gold coin, and fine gold bars from Canada, except as deemed advisable by the Minister of Finance, and as licensed by him, is prohibited until July 1, 1924, by proclamation issued in the current issue of the Canada Gazette.

Breaking all 1923 passenger traffic records, the Canadian Pacific S.S. "Metagama," westbound from Glasgow via Belfast, docked recently at Quebec, and Montreal the same evening, with a record number of 382 cabin and 1,078 third-class passengers.

"There are hundreds of first class farm workers in Scotland anxious to come to Canada, and the finest material Canada could wish for, but their wages are sufficient to barely support them and they are unable to accumulate funds for the passage." This is the opinion of Thomas Scotland, of the Canadian Pacific Railway Colonization and Development office in Glasgow, who recently arrived in Canada with a party of Scotch immigrants bound for the western provinces.

To J. K. L. Ross, director of the Canadian Pacific Railway, goes the honor of catching the world's record fish with rod and reel. At St. Ann's Bay, N.S., he landed a tuna weighing 742 pounds; length, 9 feet 2 inches; girth, 6 feet. Commander Ross used a Vom Hofe tuna rod and reel, No. 39 thread line, with mackerel for bait. His catch took three and a quarter hours to land.

The world's wheat crop this year is estimated at 3,318,000,000 bushels, as compared with 3,104,000,000 bushels last year, an increase of 214,000,000 bushels, according to figures carefully compiled by the International Institute of Agriculture at Rome. The estimated shipments from supply countries of the world for this year is 690,000,000 bushels, of which Canada is expected to supply 290,000,000 bushels, or about one-third.

Canadian trade with Australia is on the increase, according to returns made public by the Bureau of Statistics. Canadian exports to Australia for the twelve months ending with June were $19,324,239 as compared with $12,200,468 for the corresponding period ending June, 1922. Canada's imports from the Commonwealth have also increased. The imports from Australia for the last twelve months were $1,545,829, as compared with $1,275,871 for the year previous.

The Wheat Pool.

Not as much interest as was expected has been taken in securing signatures of wheat growers in the Stony Plain district to the Wheat Pool contracts. This being a mixed farming district hereabouts, added to the fact that the Wheat Pool intended handling nothing but wheat, of necessity eliminated the local farmer who does not go in for exclusive wheat growing, as practiced farther East and South. 116,000 copies of the contract had been sent out by the committee of seven and in the South these were being signed up in an enthusiastic manner. In the north, in some districts, they are being signed up equally as well. Red Deer reports 75 p. c. of the farmers there are signing; Stettler 75 to 80 p. c.; Vegreville better than 80 p. c.; at Bashaw both farmers and tradesmen are offering their services to canvass the district.

Owing to the busy season the time for signing has been extended to September 5.

The District's Best Booster

The editor of your paper is the biggest liar in town said a visitor recently, talking to a number of citizens. And there was loud applause.

"But" continued the visitor, "YOU" have made him that way, he lies when you are born, by telling what a fine addition you made to the family circle; when you attend school, by saying how smart you are and what a treat it is to the teacher to have you in the class; when you marry, he says what a handsome couple you help to make standing with your blushing bride at the altar; and when you shuffle off those mortal coil he caps the climax by telling what a saintly life you led.

And silence reigned supreme.

Prince of Wales a Canadian Rancher

This photograph of the Prince was taken on his first visit to the Dominion. To the left is seen a picture of his ranch, and above it is an interior view of one of the suites aboard the Empress of France, bottom right.

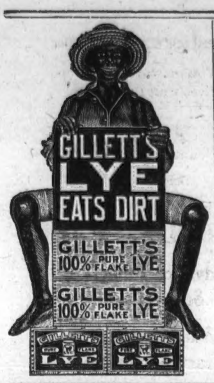
HIS Royal Highness the Prince of Wales will for a month or so become a simple Canadian rancher. That he will travel incognito on his coming to Canada does not mean that he will travel in disguise but that he will not take part in official functions or make official visits, and when approached with regard to his stay in the Canadian Dominion he has always stated that his time will be fully taken up by the affairs of the E. P. ranch.

The Prince of Wales exhibits a deep and marked interest in the ranch he purchased near Calgary on his memorable tour of the Dominion, and his desire to visit it is but a fresh indication of the importance he attaches to it and the work it is doing. Immediately after purchasing the ranch, and before returning to England, the Prince made arrangements for the shipment of some of the best stock in the British Isles to the Canadian West. Thoroughbred horses came from the Royal stud, shorthorns from the King's farm, shropshire sheep from the Duke of Westminster's estate, and hardy Dartmoor ponies from the Devon moors. The latest importation consisted of a thoroughbred stallion and four mares the finest obtainable in the British Isles. "Will Somers", which heads the stud at the E. P. ranch is a handsome five year old which at three years was the winner of several English classics.

Thus the Prince has demonstrated that his purchase of the ranch was not a matter of sentiment or commercial profit, but a genuine desire to foster the breeding of better livestock in the West. His efforts have been eminently successful. At all provincial exhibitions the animals from the High river ranch are attractive features, and last Fall, shorthorn cattle, constituting the first commercial sales the ranch has effected, commanded top prices.

Cattle from the E. P. exhibited at the stock show at the Calgary Stampede were heavy prize winners, and sheep and horses from the same ranch created an unparalled standard.

The Royal rancher has planned to arrive at Quebec on September 12th on the Canadian Pacific steamship "Empress of France". The palatial liner, 18,000 tons, which was the flag ship of the 10th Cruiser Squadron on Northern patrol duty during the War is the most up-to-date vessel of its type and is most suited to the accommodation of its distinguished passenger. Reconditioned after the war, this ship is one of the most magnificent yet comfortable vessels in trans-Atlantic service. It holds the record for oil. Its large and comfortable suites and cabins, spacious promenade decks, numerous and excellently appointed public rooms and service facilities make the Empress one of the most popular ships in the Canadian Pacific fleet.



WORLD HAPPENINGS BRIEFLY TOLD

Wages of miners in the Ruhr pits are to be increased 245 per cent. The increases are to go into effect immediately and be retroactive from August 6.

Only five passengers of the 1,186,479,000 carried on English railways during 1922 were killed in accidents. This is one passenger in every 237,000,000.

More than 500 passengers on the Empress of Canada, which docked at Victoria, B.C., told of having to take shelter from two typhoons just before leaving Hong Kong.

More than one hundred persons were drowned, about one hundred persons killed and injured ashore, and about fifty junks and sampans capsized during a typhoon at Macao, China.

Food rationing similar to that of war days was inaugurated in Gienenkirchen by the German authorities owing to scarcity of meats, fats, potatoes, milk and other essentials.

In a battle with rum pirates on board his schooner, the J. Scott Hankansen, out of Nova Scotia, Captain Arthur Moore, of Weymouth, N.S., was shot and probably fatally injured.

Russia has exported 600,000 tons of grain so far this year, according to statistics compiled at Hamburg, whereof Germany has taken over two-thirds.

Commencing with the sailing of the Canadian Winner on October 20 from Vancouver, the Canadian Government Merchant Marine will inaugurate a new monthly service between Vancouver and Avonmouth, England.

Tom Moore, President of the Trades and Labor Congress of Canada, has been named by the Executive Council of that body to represent Canadian labor at the International Labor Conference in Geneva in October.

Ismet Pasha arrived in Constantinople from Lausanne, where for several months he had been engaged in the pourparlers which led to signing of the treaties with the Allied powers and the United States. He was acclaimed by the populace. The city was elaborately decorated and beflagged, and there was special illumination in his honor.

W. N. U. 1487

How British Bagged 13 German U-Boats

Vice-Admiral Keyes Has Revealed Another War Secret

A war secret involving the destruction of thirteen German submarines was revealed at Folkestone by Vice-Admiral Sir Roger Keyes, when he was presented with the freedom of the borough. Sir Roger said that in October, 1917, a German submarine which had been blown up in Waterford Harbor, was raised, when most valuable information was found on her. There were details as to how German submarines got under or over the mine barrage across the Straits of Dover. The Admiralty then established a long line of small craft, manned by 150 fishing crews. The result was that thirteen German submarines were soon lying at the bottom of the channel between Folkestone and Cape Griz Nez.

Previously the losses of English merchant vessels had amounted to 70,000 or 100,000 tons per week, but as a result of this operation that was reduced by five or six thousand tons per week.

For Aches, Pains The Safe Home Remedy

NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats sore from coughing, quick results always follow a vigorous rubbing with good old Nerviline. If it's Cramps, Colic, Diarrhoea, Nerviline is a wonderful friend; it brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline."—35 cents at all dealers.

Celebrates Tenth Anniversary

The tenth anniversary of the establishment of the Ogilvy Flour Milling Company's plant at Medicine Hat, was recently celebrated. The plant now turns out 2,500 barrels of flour a day when running full time. Since the commencement of operations and up to the present time the company has shipped out over five million barrels of flour.

Its Quality Sells It—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

Problems Of Moving Huge Grain Crop

Distribution of Grain Cars is Important to Every Shipper

The handling and distribution of grain cars plays an important part in the movement of the wheat crop of Western Canada both eastward and westward to the world's markets. Without the first provision and constant supply of necessary box cars, the farmers' wheat cannot be moved, and the methods by which movements of both loaded and empty cars are kept under constant surveillance by Canadian National Railways officials in Winnipeg are of general interest to the people interested in the growing or handling of grain.

The movement of the grain crop each year is perhaps the biggest problem which railway officials must face, and with the constantly increasing grain haulage business of the Canadian National Railways, new problems arise each year for which solutions must be found in order that there may be no delay in getting the grain to market. With slight variations from year to year, the grain crop of Western Canada begins to move toward the markets of the world about the first of September, but preparations for this movement are begun by the Canadian National Railways many months before this.

Engines and cars are mobilized and inspected and necessary repairs made to both motive power and rolling stock, which is later assembled and then distributed through the west according to the needs of the different areas to be served. This year the Canadian National Railways are in a better position to handle the flow of grain than ever before from the standpoint of cars and power available, and all preparations have been made so that the movement once begun, will ccntinue without a hitch until all demands have been met.

Minard's Liniment for Headache

For the Motor Trip

This semi-sports tailleur presents the new set in sleeve, a full under arm line and beautifully embroidered pockets.

More Trees On Prairies

Will Make Great Difference to Welfare Of People

Remarkable progress is being made by the tree line in its natural advance upon the prairies is the cheering news to westerners contained in the statement of Mr. Arch Mitchell in charge of the Canadian Forestry car from Ottawa.

To the Edmonton Bulletin, Mr. Mitchell said: "The tree line of aspen park land has advanced from 60 to 100 miles in the last dozen years, and the general effect on the welfare of the people will be great." Following in the shelter of the aspens are the evergreens, and today spruce may be found growing in bluffs on the prairies quite forty miles from any others of the species.

Change of Water Change of Diet Change of Climate Cause DIARRHOEA

Mr. Fred Palmer, 217 Dalhousie St., Brantford, Ont., writes:—"When I first went out to the North-West the water played havoc with my bowels, and being in a remote spot I could not get anything to give me relief for any length of time.

I wrote and told my wife about the time I was having and she sent me a bottle of Dr. Fowler's Extract of Wild Strawberry, and I cannot speak too highly of it for what it did for me.

Whenever the children have any bowel trouble from eating fruit or drinking strange water, which they have done for the past five years, living in the country, the only remedy we use is 'Dr. Fowler's,' and nobody should be without it as it cannot be beat for instant relief."

Dr. Fowler's Extract of Wild Strawberry has been on the market for the past 78 years, you don't experiment with new and untried remedies when you buy it, but be sure and get 'Dr. Fowler's' when you ask for it—as a substitute may be dangerous to your health.

Price 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Third Smokestack a Dummy

The aft smokestack of the Leviathan is really a 5,367-gallon water tank, said to be the largest afloat. Many admirers of the titanic liner have been puzzled by the fact that the rear stack never poured forth smoke.

Murine Eye Remedy Co., 9 East Ohio Street, Chicago

Britain's Ships Busiest

Small Percetnage of Idle Tonnage In British Ports

Mercantile ships "eat their heads off" when tied up at the dock, and British ships are the busiest in the world, according to Herbet N. Casson, who from London sent to the Boston News Bureau a review of the annual report of the British Chamber of Shipping. He says, in part:

"The one insignificant fact in the whole report is that British ships are the busiest in the world. They are six times busier than the ships of other nations. There are at the moment 12,000,000 idle tons in the world, and only 711,000 of these are in British ports. So, roughly speaking, England has one-third of the ships on the high seas, and only one-eighteenth of the idleness."—Toronto Globe.

A Divorce Granted.

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extractor. This wonderful old remedy acts in 24 hours and never fails. Refuse a substitute and remember "Putnam's" is the only Painless remedy. 25c everywhere.

Seed Grain Needed by Saskatchewan

Saskatchewan now requires 32,000,000 bushels of grain each year to sow an average cropped area of approximately 21,000,000 acres, according to M. P. Tullis, Field Crops Commissioner. Two-thirds of the seed needed, or 20,000,000 bushels, is wheat, while the balance is largely oats, amounting to 10,000,000 bushels. Rye comes third, with about 1,000,000 bushels; barley, 700,000; and flax, 300,000.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded summer complaints. They are an absolutely safe medicine, being guaranteed by a government analyist to contain no opiates or narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Arduous Climb Brings Party To Summit of Mt. Mary Vaux

Quartet From Jasper Reach Climax of Camping Trip When They Make Supposedly Impossible Ascent

Two men from Chicago and two women from Ohio, have just reached Jasper and report that after a six weeks' journey through almost trackless wilds they have been successful in reaching the peak of Mount Mary Vaux, hitherto considered inviacible. The four who made the ascent were Douglas Sutherland, Secretary of the Civic Federation of Chicago; Ben Herzberg, Chicago Attorney; Dr. Emily J. Widdercomb, of Kent, Ohio; and Miss Mary Blakeslee, of Medina, Ohio.

When the party set out from Jasper early in July, accompanied by Bruce Otto, a well known guide here, they were told that they could never make it. "The summit of Mary Vaux is unreachable," old-timers told them. "The country for miles around is too rough." But all of the party had ridden on the elevator during the rush hours, besides being experienced in mountain climbing. So they were used to hardship.

They reached the top after six and a half hours of arduous climbing. The summit is 10,000 feet above sea level and affords a superb view of the Canadian National Rockies for miles around.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Indians' Valuable Fur Catch

A very valuable parcel of seal skins, the catch of the Indians of the west coast of Vancouver Island during the spring of this year was shipped to Vancouver for transhipment to London. The catch was valued at $30,000.

Minard's Liniment Relieves Colds

Make it an every morning habit to shine with 2 IN 1 Shoe Polishes

A New Street Cleaner

Winnipeg Is First City to Use Dustless Sweeper

Winnipeg is the first city to adopt the dry, dustless system of street cleaning. Equipment, of which Mr. Blaney, formerly a Winnipeg man, is the designer, has been purchased after the tests made before the city's representatives. It was proved conclusively that the application of water or sweeping after sprinkling with water, was not the proper solution of the dirt problem, for after the wet machine had swept a given area, and time had been allowed for the street to dry, the dustless sweeper passed over the same surface and left it polished.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eclectric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Asks For Incorporation

Big River, Sask., Will Be Furthest North Village

Application for incorporation as a village of Saskatchewan has been made to the provincial department of municipal affairs by settlers at Big River, Sask., north of Prince Albert.

The village, when incorporated, will be the furthest north of all the villages in the province. The settlement was started some years ago by lumbering interests, which were subsequently bought out locally and lumbering and fishing form the main activities of the settlers, who are too far from a railway to grow grain extensively.

Memorial to Columbus

It has been proposed that the largest lighthouse in the world be erected on Santo Domingo as a memorial to Christopher Columbus, to be paid for and supported by the twenty republics of the western hemisphere.

Minard's Liniment for Corns

An adult sea-lion has been known to eat forty-four salmon in a day.

The sun gives 800,000 times more light than the moon.

PILES Do not suffer another day with Itching, Bleeding, or Protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample Box free if you mention this paper and enclose 2c. stamp to pay postage.

The Chautauqua Committee meets tonight.

Stony Plain Fair, Sept. 18 and 19.

Results of the Departmental exams. at Spruce Grove school —Passed, Helen Martin, Simonne Guenette, Freda and Marie Loeblich.

Duck shooting season does Not open on Sept. 1 this year. The date has been changed to Sept. 15th.

Baseball fans in the outside districts are trying to organise a team to give Mr Laird's triumphant aggregation of ball players a beating. Let 'em come!

Officers Rae and Fiddler, of the Inland Revenue service, and Corp. Merrill, of the R.C. Police, made the capture of a still in working order, in the Rosenthal district last week. The two men apprehended at the time were taken to Edmonton for trial. Each were fined by Judge Emily Murphy the sum of $450 and costs.

The Next of Kin Society which has been camped at Edmonton Beach for several weeks, returned to their homes in the City today.

When the wheat raisers got into the grain with their machines, a number realised the loss by hail had been overestimated.

Inga District, with its good records for high grain yields, promises this season to outdo all previous returns.

August Kreye is already in the field with a record for grain grown on his farm this year. From an 8 acre barley patch he has threshed 316 bushels, running nearly 40 bushels to the acre.

Yesterday's Ball Game.

Evansburg's ball team played in Stony yesterday. The visitors were short their regular pitcher, who had been taken to the hospital a few days ago. For Stony, Simmons pitched the first four innings, followed by Loeblich. At the end of the fourth, the game stood 4 all. The visitors got 4 more in first half of the fifth. Stony's players braced up when things looked pretty bad, and when the game was called at the end of the fifth, Stony had made it 11 to 8 in their favor. The home team was fortunate in making 7 runs with two men out, Geo Graden's home run, and base stealing by Laird, Moyer, etc., contributing largely to this.

When Lightning Strikes

On Thursday evening last, when the electrical storm which visited this district was at its height, a lightning bolt struck the barn of Mr John Goerz, who lives about six miles north of town. This gentleman was just in the act of sitting down to milk a cow when the lightning hit the structure, killing the cow, prostrating the would-be milker and Mrs Goerz. A child who was seated nearby escaped injury.

Inga News.

School opens Tues., Sept. 4.

Everybody is harvesting.

Mr Bert Ellis leaves Tuesday for Colispell, Montana, where he is engaged in teaching school.

Mr Emil Pitzler, Puyalupp, Washington, is visiting here with relatives.

Mr A Ellis and children visited Mr and Mrs John Ellis on Sunday.

Rev Mr Simpson, Edmonton, delivered a very interesting sermon at Warden school Sunday afternoon, quite a large congregation being present. The Rev. gentleman expects to be back in the near future.

Miss Emeline Wettlauffer expects to leave in a few days to attend school at Edmonton.

Mrs Geo Liebert was given a surprise party on Sunday evening, Aug. 26, in honor of the anhiversary of her natal day. After doing justice to a lot of ice cream and cake, the bunch departed at a late hour, wishing Mrs Liebert many more happy birthdays.

Sports Day at Evansburg

Announcement is made of a big Sports Day to be held at Evansburg on Labor Day, Monday, Sept. 3d, when a large program of sporting events now being arranged will be run off. The prominent number on the card will be a baseball tourney, in which all the teams in the Northwestern League will compete for a $100 prize.

A big delegation is expected to attend from this town, as the chances of Stony's team spearing the big money appear to be pretty good.

The Football team has been invited to Evansburg for Labor Day.

Local Fair Postponed.

The Directors of Stony Plain Agriculture Society have decided to postpone the Annual Fair to Tuesday and Wednesday, 18 and 19th of September. This action was taken owing to the present busy harvest season. The Directors regret that such a short notice was given of the change of date, but they felt that this was their only way out of the matter. Entries will stand, as made. Entries which cannot be exhibited on the date the entry fee will be returned. Entries received up to September 15.

Institute Items.

There will be a regular meeting of the Women's Institute on the second Wednesday in September. Place announced later.

The Sewing Demonstration given by Miss McConnel, of the Department of Women's Extention Work proved to be very successful. There was not as large an attendance as should have been considering the excellent course of instruction Miss McConnel gave. Those who attended the classes were delighted with the help and instruction given then in pattern drafting, fitting, making of garments and the lesson on fancy stitches.

Restaurant Changes Hands

Negotiations have just been completeted whereby the Restaurant on Main Street which has been run for over a year by Mrs. T. L. Williams passes to Mrs. Pfeifer, who has operated the Ice cream and lunch parlor next to the Freifeld Departmental Store. We bespeak for the proprietor a good patronage in her new quarters.

Wheat Prices Up.

The recent up-jumps in the price of No. 1 Northern has been a great surprise to many. Reports say this is owing to the very low grading of the wheat which has so far gone to lake head ports. Local growers will greatly appreciate the favor if the price stays up till they get theirs hauled.

FOR SALE—16-20 Runely Tractor and a 22-32 Separator. Apply August Albrecht, Stony Plain.
